

## **INTRODUCTION TO AWAROLOGY**

way of attaining eternal life. But this enlightenment is only a beginning of real spiritual life. The rest of the life completes this intelligence of body and mind and set free the real consciousness forever at the time of death. The life of this enlightened state will be full of bliss and happiness even though one has to suffer severely in one's physical life.

Note : The real consciousness is self sufficient in itself. It can "foresee" the things and direct your body to fulfill its aim.

Explanation :- This point should not be misunderstood with the fortune telling or any kind of prophecies.

When a man finds truth of his life or his real consciousness or soul at the happening of enlightenment his consciousness floats up the mind. Ever since the mind minimises the ignorance or its ego or blind desires and get clarity in its Karmas. So that, for him, the life will be in moment to moment or he lives through the happenings of a day which means he will have no thoughts of past and future in his Karmas. He will become an awareness himself. That awareness itself will work. He should not be prone to any kind of ill-health or accidents in his life.

An example will clear this point. If such a man travels in a vehicle, his awareness will influence the vehicle somehow and the result will be either the safety of the vehicle or his escape without any hurt in an accident because the real consciousness is in need of his body till it reaches the maximum mystic intelligence, then only it can leave the body forever. If there is anything like fortune tellings or prophecies it might have been by the power of mind. It may be some kind of extra sensory perceptions. This state of mind is entirely opposite of mystic intelligence and dangerous to the freedom of one's soul.

Everybody learns Science, Technologies, economics and philosophies spending a good part of their life for what? To survive in this world, to get job for their livelihood. If you are intelligent and competitive you succeed, then comes the question for what? Is it to lead a good family life? Or enjoy life in its full swing?

Then, comes the question what is life? Get married and enjoy sex for a very short time? Or give birth to children and work hard and drag your life in misery to fulfill their or your ego? Or to get a good income? But again the question remains what is your life? No answer is possible. At the time of death you think what is life? The death is a reality, it takes away all your 'achievements and belongings'. Again the question comes what is your life? You yourself become an idiot before this question.

Your misery, pain and hardwork of your life are not compensated, you are frustrated. At your old age deep down in your mind, you feel that you missed the life. You became an unwanted element now. A loneliness surrounds you, you are desperate. You see others repeat your life. You know they can't find the meaning of life. They won't listen to you. Again the question remains what is life? Your academic studies could not teach you what is life because they are the tricks of your logic mind. You are in a trap, a trap of desires. Intelligence can't understand this, because you yourself is a product of the intelligence of desires. Ofcourse you enjoyed certain fruits of sciences and technologies upto death. In reality you never die. You only change your body with different genetic pattern. Can you choose your life? No. The present life was not of your choice. Your body was imposed in you without your consent and choice.

But can you stop it? If you believe that you have only one birth and death, ofcourse you are right, there is no need of knowing the meaning of life. But you should not be blind towards the proof of it. You seek the memory of past life in your present one.

You are not intelligent at all. Memory is made up of flesh which turns to dust after your death. But your consciousness can't die because it's not at all flesh. It is under the bondages of certain desires in the form of ignorance as thoughts. Your body is a growth and a product of your mind. A product has only an intelligence, which is given by the producer (the mind which consists of real consciousness, intelligence, memory and perceptions of five sense organs). So your real consciousness (soul) searches new possibilities to escape forever into its original source, the Great Consciousness, this is the aim of your life, it is the meaning of your life, the eternal life, Nirvana, Samadhi or Liberation of your soul.

But your intelligence can't understand and experience the meaning of rebirth, the cyclic growth and life of flesh and mind. Your intelligence is logic and you cannot see how false is your logic. Even Science is loosing logic. Your mind is tricky, it has the technique of concealing the failure of your logic. Your ego shifts your logic finding some reasons.

Your real consciousness does not grow by your education because your education is on the basis of logic and logic is against the "uplifting" of your real consciousness. You may be a great Scientist, a great Economist or a great President of a country but your consciousness is only upto 3 years old child. It can be easily proved.

A "Great" President of a country presents a gift to a "little great" President of another country, a war plane and later more war planes and bombs as the token of thanks to the support offered

a greatest blessing of human beings. But as this state is happened in a human body driven by genes will have a strong influence of it (genes) so when the person who is in this state knows himself, becomes desireless and compassionate towards his fellow beings. And also this state may give rise to certain siddhies or mental faculties. Thus this state becomes treacherous to that person in two ways - 1) His enquiry of himself to set his soul free for ever is doomed by his genetic influences. 2) The siddhies attract the common mass and the person is trapped in spiritual ego. And he becomes a leader of the society by the charitable activities and gets exploited. The result is, the world starts worshipping their photos, use certain tricky yantras or mantras or some new methods of meditation or living style etc for their physical benefit.

Whereas the mystic intelligence is totally different from this. This is the one and only way to set free your real consciousness (soul) for ever into the kingdom of God or Samadhi or Eternal life or the liberation of Soul. Even though this is a happening by itself man has to strive throughout the life for this to happen. That means man has to struggle and work hard step by step to remove the basic as well as acquired ignorances from his mind by utilising the anxiety. But normally our mind uses this anxiety of real consciousness by its intelligence using logic to know about the secrets of the outer world. The result is the scientific ideas, technologies and your so called comfortable life. But if this anxiety is directed to his inner consciousness by using the same intelligence of mind and logic, it is absolutely sure that anybody can find his soul by certain happening. This happening is known as enlightenment and this stage is known as mystic intelligence. This mystical intelligence is the real aim of human life and real

In certain human beings this anxiety finds its way through intelligence to find the meaning of life. They save their real consciousness into the eternal life. These human beings are called mystic intelligent people; the real gurus of the world. Whereas in some human beings a mystic state is happened. This man show certain siddhies (ability to move their limbs fast, ability of hyphonisation etc.) It is a natural selection by the critical combination of certain genetic patterns with a mind having certain positive karmas. In most cases these people cannot develop intelligence upto the mark of mystic intelligence. They shift their physical ego to spiritual ego and gets trapped again. They may run charitable movements and spend a life in their spiritual world.

A man with mystic intelligence definitely finds the way to save his real consciousness forever because the real consciousness is self sufficient. It works in its own way. It knows the past and future (Don't misunderstand this statement with fortune telling or prophesy etc., these things are of the minds business. The explanation is given at page No: 40.)

The mystic intelligence pushes the body and mind in right thought, right memory, right understanding and enlighten the mind with correct wisdom by removing all ignorance.

Note : The difference between the mystic intelligence and mystic state.

The mystic intelligence and mystic state are different. You can see the people having reached the mystic state by the phenomenon known as natural selection. Birth after birth, genetic pattern after genetic pattern and karmas (cause and effect) after karmas by the backup of real consciousness, a man or woman is born once in many years in mystic state. In reality this state is

by the second one to eradicate terrorism. Small countries need food not bombs.

Think of their consciousness level. One gives, the other accepts. Newspapers appreciate the act, so all their consciousness are balanced.

Awarology proves and establishes in you beyond the doubt that your life has very clear aim. You are born not for living back to beasts. You bear a consciousness, which is known as real consciousness in Awarology. The consciousness, which knows the consciousness, which is roughly known as your soul. This real consciousness is not your mind and not your body. It is a dimensional different entity. It has no death, no origin and no end. It is the consciousness, which suffers the pain of your body system through mind. It cannot die with your body. Your mind is the working ego of your personality. The mind cheats your real consciousness by desiring life. So it takes birth, grows and dies and your real consciousness is fooled. But the real consciousness seeks another possibility to escape to eternity through another body in new genetic pattern and in new intelligence. It is not because of your Karmas and fate. Imagine a hospital full of cancer patients suffering severe pain or a slum of poor people suffering poverty and ill health in filthy condition. They are suffering not because of their fate and karmas (those ideas are the cheating tricks of your mind, society and religious people to exploit you) but the deathless real consciousness (soul) has chosen a new possibility to escape. If you are in well off position and state, do you think that you are safe? No, absolutely no, you can never die but only change your body. If you miss this chance your real consciousness may choose the worst. You cannot deny or do anything. You know that there was no choice of yours in your present life. This fact is as true as your existence itself. If you

think otherwise and deny this truth Awarology assesses you as a being of very poor intelligence, it doesn't matter however rich, or famous or powerful or educated you are at present.

You accept your misery as a part of your life instead of knowing that your life is an eternal bliss or Paramananda. The Awarology is the only Science man has to learn and develop. It gives you the real aim of your life. Your birth is a golden opportunity to find your real consciousness through Awarology and "uplift" it from its ignorance and set free forever into the eternity or to the life of Paramananda, a happiness having no cause. YOU TAKE BIRTH FOR NOT TO BE REBORN BUT TO STOP BIRTH FOREVER, because your mundane life is full of pain no argument is possible for the pain by the presence of your nervous system. No argument is possible for your spontaneous thoughts of your mind and its depressions, and mood change which lead you to drugs, alcohol, insanities and suicides.

Awarology is a pure Science on the basis of logic and inner experiments. It has no connection with any ideologies, isms or any religious faith.

Awarology proves and gives experiences in you that you are a soul or a real consciousness, which is absolutely independent of your body and mind. It offers two understandings in you .

1. In your physical life you can have a taste of Paramananda and eternal peace (a causeless happiness) . 2. It convince your intelligence that your real consciousness is under the bondage of your mind and body, which have the supports and backups of thousands of tendencies by the presence of genetic patterns or programmed chemical molecules.

Awarology makes you understand by its logic, techniques and experiments to convince your intelligence and get free your

producing so many sophisticated equipments which can be enjoyed and you can lead a life in total imagination. This make misery more complicated, so that, the rate of mental disorders, different diseases of depression, madness and suicides are increased. So ego is moving towards the deepest ditch of unconsciousness. This makes man the most cruel beast ever lived on earth.

11. The misery and pain are suffered by the real consciousness. As it is static and neutral, it never judges it. It has no way to convince intelligence that its nature is Paramananda, except to persuade the intelligence to remain as a witness.

So intelligence should enquire about the reason for misery and pain. If the intelligence is sincere and full of energy it can find the reason and bring the taste of Paramananda and try for the resurrection of the real consciousness. But as the intelligence is driven by the desires (Basic and acquired) it cannot have the balance energy after the working for fulfilling the endless desires and sexual indulgences. So, intelligence uses a trick. It gives hope and shift this hope time to time to extend the life till death of the body. At the time of death intelligence concludes that the life was a sheer waste.

12. The presence of anxiety and uncertainty in human beings make a marked difference between human and beasts. This is because of the presence of a factor (Wx) the real consciousness in human intelligence. In other words the real consciousness (soul) is emitting a 'wave' of anxiety continuously through intelligence for persuading it to enquire about the self or the real consciousness itself and to question the miserable state of body and mind in earthly life. But normally the intelligence shifts this anxiety outward and find some logic answer to this and proceeds.

discriminative power and logic denies the soul and its Paramananda state and make everybody to realise that life is a set of passions and reasonfult happiness and even push the life in related love, goodness and sacrifice for the beloveds upto death thinking that all relationships are real and for that relationships, he has to live. This intelligence always insist a human being in wrong way that the eternal life can be attained by this related love, goodness and sacrifices.

9. Through witnessing and awareness the real consciousness convince the mind its basic ignorance on life and persuade to remain in neutral state to escape from the effect of karmas (actions) of life. So that the real consciousness get out of the bondages of effect (which makes to take new possibility by re-birth) and set free forever into the Paramananda or eternal life or nirvana or Samadhi.

Whereas the intelligence by the help of memory of the past and imagination of the future (Both the thoughts are spontaneous in nature) push the life away from the present and moment to moment life and put it in the trap of cause and effect (karmas) and drag the life in misery and severe pain (physically and mentally) into thousands and thousands of lives having different genetic pattern and the result is that the real consciousness got arrested in the world forever.

10. The real consciousness is 'uplifted' very slowly by developing witnessing power and awareness. It needs tremendous energy and effort because it is a dimensionally different entity and stands reasonless.

Whereas intelligence multiply collectively just like relay race and entropy (the rate of disorder) of the mind increases. This hike of intelligence give birth to science and technologies

real consciousness (soul) to lead your present life in peace with the taste of paramananda and after death into the eternal bliss or kingdom of God or Samadhi or Nirvana.

Note: A few words about Nansen School of Awarology And Nansen Ashram.

The School and Ashram are situated in a naturally beautiful, silent and cool valley near to the Silent Valley of Attappady Hills in Palakkad district.

At present Ashram has only one inmate, that is the master himself. The contact classes will be arranged in the school situated in the Ashram Premises later. So, if you send your address through E-mail or by post or by telephone the master will contact you to inform about the date of the classes and facilities for your convenient stay.

Thanking you

The Master

## SECTION -1

### What is Awarology?

Ans : Awarology is a science of life which is defined as the logical methods to help the mind to remove its basic ignorance and annihilate it, to release the real consciousness (wx) to eternal bliss and to reunite with its original source, the Great Consciousness (God).

The real consciousness (wx) is supposed as the 'part' of the Great Consciousness which is united with the thought of ignorance of a person x.

2. Why should we learn Awarology?

Ans : It is the one and only way to escape forever from one's miserable life and live with the life one is gifted in this world neutrally to taste and enjoy the state of Paramananda (Eternal bliss, which has no reason) and at the end of the life to release the real consciousness (soul) from the bondages of the body and mind forever. Your real consciousness takes birth one after another until it is set free for ever by you in any one of the lives. If you believe that you have only one birth there is no need of the science called Awarology for you. Awarology proves in you the possibility of rebirth by your inner experience and logic.

3. What are the differences between the studies of Awarology and other studies in academic level (Physics, Chemistry, Biology and Social Sciences)?

Ans : All the other studies are of mind. Mind is a combination of intelligence, memory and perceptions of five organs which is run by the "subtle energy" of consciousness. But these factors cannot work themselves because they are the properties of ignorant consciousness. So the mind appears to be born as a body which grows, develops with sense organs and live for a

real consciousness cannot judge and criticize the life and its Karmas and activities. It has to force the intelligence by the uncertainty and anxiety of life and its sufferings of severe pain by the body and mind to bring the mind in real awareness for witnessing.

As intelligence stands on intensive desire and selfishness, it always persuade the mind by its logic to shift the aim of life with incorrect memory by finding unsubstantial reasons. So life is fixed in this world forever.

[This point can be understood by an example:- A father is shocked when his obedient and very good son unexpectedly meet with an accident. His misery and agony cannot be measured, he loses the whole meaning of life. After some days or months or years he recovers partially from this misery. His memory fades, his tricky intelligence argues that it is his fate or it diverts his aim of life in different ways. That means intelligence shifts his aim of life and makes him busy with some other thought by incorrect memory and unsubstantial reasons. This is a safety mechanism. But his intelligence never persuade him to enquire about the misery of himself and others and the whole world. If he searches the reason intensely, devotedly and with total sincerity he will find his soul or real consciousness. But tremendous energy is needed to devote his life for that. Man is lazy by his excessive sexual indulgences and with never ending selfish desires. So this is the reason behind the continuity of misery in human beings.]

8. By the presence of real consciousness in human beings he will be able to witness the life and allow the body to happen neutral life and live till death in full awareness and Paramananda and part the soul to eternity after death.

Whereas the presence of intelligence in mind with its

[Again the same example of bulb can be used to understand this point. When the expiry date is over the bulb is fused, even though the current is there at the two points of the holder, there won't be any light from the bulb. So bulb "thinks" that I have died, it doesn't have any idea of a current waiting at the holder to flow through it. It knows only one thing that when the life time of filament or the sealants are over it cannot emit light. It has to die. But there is an ignorance of a current behind its glow. Similarly intelligence informs the mind that the expiry date of a particular body is over so it has to die. Then body dies and the real consciousness with full of desires grab another new body and come again into the earth. Again the intelligence in new genetic pattern repeats the same mistakes. The old fused bulb is replaced with new bulb, again it glows in the same holder and the new bulb is totally unaware of the holder which had an old bulb.

In effect the real consciousness (soul) of a person suffers all the pain imparted by the body and mind due to their ignorance.

Whereas intelligence is mortal and lead the human mind in ignorance by analysing the outside world as reality with the help of limited perceptions of five sense organs so that mind continues life taking different body in different genetic patterns and stay in ignorance.

6. The one and only nature of the real consciousness is paramananda (the causeless happiness). Whereas intelligence makes the mind to understand that there should not be any happiness without reason. By the discriminative power of intelligence it cannot have an idea of a thing which has no reason. This is the reason why people ask for the proof of the presence of real consciousness (soul) in human body.

7. As the real consciousness is static and neutral in nature, the

period of time and get old and die without the consent of mind. As it is born and die without the consent of mind, it will be reborn without the consent of mind which is purely logical (not a hypothesis or a belief). So the life is a three dimensional projection of the real consciousness through the mind in the fourth dimension time. (Just like a red glass which allows the white light of sun appear to be red; red glass is the mind and white light is the part of the Great Consciousness which we call real consciousness or Athma.

Whatever mind thinks and discovers about the truth will never be correct, or in other words mind will never be able to find real truth or fundamental state of a thing or a being with its tool, the logic.

Fundamentally mind has only one property which is logic: It can function only by logic, it judges the thing with its five organ's perceptions and concludes, but these conclusions are to be updated time to time with the help of logic and to be proceeded . This is the evolution of mind and its products are physical sciences and social sciences.

Whereas Awarology is the study and techniques with the help of mind ie logic to "destroy" the mind itself (the red glass) to know the real consciousness (white light) which is Paramananda and to release the real consciousness (Athma) which is in bondage of the mind and the body for thousands of births, to reach its original source, the Great Consciousness (like through the ray of white light we can contact with the sun).

If there is a red glass, the ray which passes through it undergoes certain changes and becomes other than white light, which has no direct contact with the sun. But a false contact is possible that is the way by which all the human being contact

with the 'God' in worldly way ie through prayer, fasting, offerings, occultism etc. A false 'God' is appeared to be as real for them.

A second difference is that all other sciences search the real truth outside, means by the perception or openings of the body (sense organs) whereas the study of Awarology is purely inner. It teaches a person to persuade his mind to remain as a witness for his perceptions and understands everything without being provoked.

The third difference is, by the physical science certain product has been resulted, for example, discovery of electricity gives fan, engines, AC etc. as its product which can be enjoyed and in turn it makes us believe that the outer world is real. This is a trap of your mind not to get itself static or Neutral.

Whereas the Awarology has no product possible like mentioned above. It has one and only one aim ie to go inner and find the real consciousness and "uplift" it by Awarological techniques and go into the eternal life, or Nirvana or Samadhi at the time of death.

4. Should the study of Awarology make a man introvert?

Ans : No, absolutely No; because an introvert is a mentally retarded person. It is caused due to the depression of his mind and he thinks that he is a particular mind and body having a particular name.

But Awarology is the study of techniques using the active or dynamic mind to function logically to eradicate the ignorance which hides the truth by the logic itself. So there is no chance for being introvert.

5. If everybody is searching inside and lead a life corresponding to that, will his life outside (family life or social life) affect the society and the persons depending on them?

Ans : No, apart from this, opposite will happen. The life of

1. The real consciousness is appeared in the mind (mind is a combination of intelligence, memory and perceptions of sense organs, in other words it is an ego) as two abstract nouns-

a) Awareness b) Witness

Where as intelligence is a relative reality as

a) discriminative power (b) Logic

2. The real consciousness is a dimensional different singular entity which stands absolutely independent of mind and body.

Where as intelligence is three dimensional reality having a sense of time dependent and related outside object and persons which has a seat in brain cells and completely dependent on mind and body.

3. The real consciousness is neutral and static in nature. It has no positive and negative aspects.

Whereas intelligence is dynamic and lead the life in +ve and -ve aspects with very little awareness. By nature it has no capacity to exist in the middle or zero which means that the intelligence never insists a person to live in present or moment to moment in spontaineity.

4. The real consciousness is beyond the space and time. It has no beginning no end. It is the one and only reality ever existing. Whereas the intelligence take birth, grow and die, that means it has a beginning and an end. It is not at all a reality because it stands on flesh and helps the mind by its discriminative power to judge and criticize everything spontaneously throughout the life of a person. It has a very clear sense of time and space.

5. The real consciousness is an entity which has no birth or death. It is the underlying current of the existence of desirous and selfish mind. It is forced to take cyclic body periodically in different genetic pattern in different birth.

caused a part of the intelligence to become selfish desires. In plants there is only a desire of reproduction which is either sexual or asexual but in animals both sexual reproduction and food desires are there. That is in animals two fold desires are there.

In human beings exist three fold desires. Sex is for the sake of sex and reproduction, dependence for food and shelter and relationship (or relatedness) That means desire and selfishness have increased three fold and more over the doomed consciousness opened itself, that it knew it has consciousness. So, knowing of Consciousness by the consciousness is termed as real consciousness.

The possessiveness by the sexual passion, dependence for food and shelter created fear in human beings. Animals fear is very much limited. It works only in instincts. They are not afraid of loneliness and darkness. But human beings are very much afraid of loneliness and darkness, this increased the quantity of desire and selfishness in the form of relationships.

So, when the evolution reached human beings the desire and selfishness increased to such an extent that the real consciousness was bound in number of chains. No escape was possible. The desire is too strong in human beings to recognise himself that he has a real consciousness (soul) in him. The only hope is that a small number of human consciousness (mystic) has realized that man is in the bondages of an ignorance of selfish desires which is the only barrier of the freedom of real consciousness. So they have introduced many techniques of developing our intelligence. But, so far the intelligence was cheating the mind to hide the wisdom of Paramananda or eternal bliss. Awarology tries to rectify this mistake of intelligence.

Bearing these factors in mind, we have to differentiate the real consciousness with intelligence.

others who are depending on him and society will be more benefitted by the person who seeks his soul inner with the Awarology because by the Awarology it is not the intelligence or logic which grows but the real consciousness, it is the 'part' of Great Consciousness which is godly by itself. God can never be able to do mistakes. So higher the consciousness of a person better will be his attitude towards society and relatives and he creates a blissful atmosphere wherever he goes. But in the case of higher intellectuals (academic higher product) they use cunning logic for being selfish in an intricate way. (Remember that they know good and bad are relative and has no meaning). That is why the world is under the custody of certain families. Actually these people are real carriers of doomed consciousness of the world and they create poverty, social inequality, wars and contagious diseases and the world become more miserable than its natural state.

6. From the above answer it seems there are two types of misery, what are they?

Ans : In the point of view of Awarology there are two types of misery for human being.

1. The natural state of misery by your birth ie the pain due to the diseases and accidents.

2. Added misery due to the men being a social creature, the relatedness, possessiveness and selfishness create miseries like poverty, wars and artificially made contagious diseases and other poisons released from the unintelligent way of running the industries and cultivations with selfish motivation.

7. Why is the Awarology called a science eventhough it seems to be having a metaphysical nature?

Ans : Awarology is a pure science because it uses logic

and depends on self experimental proof as its base like all other sciences. The only difference is Awarology uses logic to minimise the spontaneous vibrational thoughts of mind and bring out the real consciousness (the experimental proof is inner experience) but all other sciences use logic to strengthen the mind and physical life (the experimental proof is outside the body as products). Awarology explains things by the logic and proceed through the logic and at the end it has the technique to go beyond the logic to save the human soul from the misery forever. Whereas other sciences explain things by the logic and proceed through the logic and experiments and turn up with a physical product or without product useful or useless to the human to retain the human misery in more and more dangerous ways.

8. Whether Awarology has any relation with religion or other sciences?

Ans : Fundamentally Awarology has no relation with any religion or sciences. But it uses certain ideas of religion and physical sciences to make people understand things easily because people are only used to religion and physical sciences. In this point of view Awarology is an extremely new science having no material outcome specifically but it is the underlying current of all the souls to be freed from physical life.

9. What is the main difference between Awarology and Physical sciences?

Ans : The discovery of electric energy and its properties by intelligence could give birth to so many equipments which help the worldly life comfortable for a period of life cycle which is miserable by the presence of pain and its repetitions (rebirth). But by the properties of real consciousness, through Awarology, help people to taste the Paramananda (a bliss) and eternal peace

## **SECTION -2**

### **The difference between the real consciousness (soul) and human intelligence.**

In the sense of language, intelligence and the real consciousness are different entities. But deep down they are same. By electric energy a bulb glows. Electric energy and light are not same. Light is a projection of electric energy to a sensible state. The bulb is the equipment which stands in between the electric energy and light. At the bottom electricity and light are energies and same. Similarly the real consciousness project the intelligence by the 'equipment' namely human body. In their functions electric energy and light are different in nature, similarly the real consciousness and intelligence are different. One is the source other is the projection, the phenomenon of projection is happening in body.

Intelligence is a relative reality as far as human body is concerned. The main outcome of intelligence is its discriminating power and logical thinking. In plants there is intelligence, they survive in the nature, prepare food for them by photosynthesis, grow and reproduce.

In animals also there is intelligence, they survive in the nature, find their food, grow and reproduce. Here the notable difference in intelligence is that plants cannot move from one place to another, where as animals can move. But for the freedom of the movement, animals intelligence had to sacrifice the self preparation of their food from the sunlight. This caused a partial slavery for them ie dependence. But the danger of dependence

viz Awarology and the function of Nansen school of Awarology and Neutral life.

Please keep in touch with the master if you have understood the little information given above and if you think that you are a pure consciousness (soul) other than your body and mind ie keep faith in the master of Awarology we together can share the new science for the suffering souls of the humanity. If you are not of the world nothing can stop and frighten you from the uplifting of your soul.

You are cordially welcome to the Ashram. Remember Nansen Ashram has nothing to do with any kind of miracles, healing techniques, occultism or magic or tricks. It has no connection with any religion or isms or any kind of social welfare activities. Ashram has only a master who is a very ordinary man working hard for his livelihood. Donation of any kind and fees collection or subtle businesses are not allowed. The people who seeks eternal peace and bliss in their present life and eternal life or Samadhi or Nirvana or liberation of their soul after death are welcome. Qualification, caste and positions are not at all considered.

in their life for which a man is born and after death it takes away their misery forever and get absolute freedom from the physical life.

10. What is the basic difference between a religion and Awarology?

Ans : In effect all the religions teaches to follow a particular scripture and believe in certain deity as a mediator. The religious authorities give more importance to the physical benefit of everyone and people are suffering from physical problems of life and insufficiency. They don't know what is real belief. They follow scriptures and beliefs by the logic because intelligence knows only logic. It has no idea about the real consciousness (soul) so by the interactions of collective ego or mind some people feel benefited by the so called scriptures and religious deities. So those who feel benefited will give a share of the physical benefit to this religious people. So a subtle business and exploitation exists.

Whereas the Awarology teaches people certain practical methods logically on the basis of physical sciences, and the people who understands the logic and its practice will have the absolute wisdom of inner existence of real consciousness. So nobody can prove it to be wrong because the experienter knows the experience as real as their existence, so prayer happens in him and strong feelings of connection with Great Consciousness (God) itself in their minds exists. No physical benefit is attained. So there is no question of any kind of exploitation. To learn Awarology properly you should be self sufficient or in other words when you start learning Awarology you become self sufficient slowly and step by step. Nobody can exploit a person who is self-sufficient by Awarology.

11. What is the difference between knowing and practising Awarology and logical advancement of human intelligence?

Ans : The logical advancement of intelligence is science and its result can be conveyed and enjoyed (electricity, automobile etc.) as it is the result of logic extended to outside, but the truth of life cannot be revealed to a person as the truth is not outside. Whereas Awarology is a Science using logic upto a certain level and extended to inner and practise to witness the mind and its spontaneous activities so the mind slows down and the frequency of STR (Spontaneous thought rate) is minimised. This gives one to know the existence of real consciousness and its bliss, so consequently he can practise witnessing to 'lift' the real consciousness to release it from the bondages of mind and body forever. This is known as eternal life or Nirvana or liberation of soul or Samadhi.

12. What is meant by dimensional difference in Awarology?

Ans : In Awarology, the Great Consciousness (God) is said to be a dimensional different entity. It means that in our physical world every object and radiations is said to be three dimensional, means it can be located with three co-ordinates x, y, z. So in the universe every matter and radiations are three dimensional which evolve in the fourth dimension of time. And also science concludes that it may crunch again into a point of singularity showing zero value and infinite density, a region of space, time known as blackhole.

Any matter or thing more than four dimension cannot be visible. So Awarology finds the Great Consciousness has no dimension or other than three or two dimensions. This is known as dimensional difference. This explains why the real consciousness is not a visible and measurable entity.

13. What are the important three dimensional qualities of doomed consciousness?

Ans : Motion, radiations, life, growth, reproduction and death

it due to the taste or selfishness. After filling the stomach with more than enough it starts to make problem. Then you go for medicine or become uneasy and restless. The body consciousness is very difficult to understand by the mind because mind is full of burning desires and selfishness.

Many preparations have to be taken before understanding Awarology successfully and get the result of its experiments in right sense.

Nansen School of Awarology and Neutral life has developed many techniques to teach what is witnessing. How can it be proved in every one's body? How can you strengthen the power of witnessing to overcome the bondages of mind and body which stands forever in the world by the help of karmas?

The School is peculiar in a way that it deals only one subject which is witnessing whereas all other sciences and techniques of the world teaches to strengthen the power of mind which is a great barrier of real consciousness to be set free from the body and mind, the real aim of human life. The school is strictly for 'uplifting' the real consciousness by awareness on the self of a person through eradication of ignorance of the mind step by step taking many years giving only contact classes for a period of one or two weeks. Awarology uses your mind as a laboratory and life as its equipments. After years of training you will be able to learn how to witness the life and live in total awareness which slowly gives the feeling of your STR (spontaneous thought rate) decreasing and an eternal peace is entering in you slowly and you see the life has shifted the meaning from physical means to spiritual means without hurting your family life or related life in the society.

Hope that you have got some vague idea on the new science

A student of Awarology will never think of suicide in his whole life. He will never go mad in any circumstances. He will never be afraid of anything in his life. He will never undergo any kind of mental disorders like depression, hypertension, complexes etc. He will be so compassionate and show the quality of sharing without any complaint. As his STR decreases, concentration increases so that he will be truly competitive in his studies and examinations. He will never talk too much and never run after fantasies like cinema etc. That is why Nansen School of Awarology insists the government to accept Awarology as one of the subjects for the academic studies giving equal importance with physical and social sciences. The students will enjoy awarological techniques because it is the science of life. So the life will be overflowing in them whereas the other sciences are pure and dry logic, and if you proceed after a certain limit this logic may lead to madness because logic mind may search truth outside but truth is inside, not outside. That is why extra ordinarily intelligent people become eccentric in certain ways.

20. Before learning Awarology, is there any need of preparation - physically or mentally?

Ans : Yes. Learning Awarology needs a number of systematic preparations. Your body is programmed with so many tendencies by the presence of genes. Mind and body are closely connected and work in some kind of synchronisation. If one is in disorder other has to suffer, compensate and compromise for that, otherwise life will be in trouble. When you watch your mind closely you can see that your consciousness is felt divided into two as body consciousness and mind consciousness. For example you like the taste of a food and you start taking it, after enough of food stomach will say to stop it. But your mind rejects

are the main three dimensional qualities of doomed consciousness.

14. What is the doomed consciousness?

Ans : "Doomed consciousness" is a 'part' of the Great Consciousness which is contaminated with a thought of desire or an ignorant thought, which turned into doomed consciousness which is indicated as FD ie fundamental desire.

This desire was an ignorant thought which thought that there may be happiness more than the paramananda or eternal happiness outside the Great Consciousness.

By this ignorant thought when it 'parted' from the Great Consciousness it went into doom ie fell in the dark and lost its wisdom of Paramananda or eternal happiness (ie a happiness having no reason). So this doomed consciousness began to evolve, and by that creation of universe happened. It evolved in time and space. After millions and millions of years it came upto human being where it got an opening and recognized what had happened. So it tried its best to reach the Paramananda through the passion of sex. But sex is a trap of ignorance from which no escape is possible as far as ordinary limited intelligence of human being is concerned.

15. What is the necessity of making the life in real awareness?

Ans : Evolution of matter into life and to human being is the evolution of doomed consciousness ie the ignorant mind. The ignorant mind supports the body to grow, live and die. So logically it is possible to think that the natural human life should be in evilness. To think in evil or judge others or blame others or for evil act and for lying... no consciousness is needed. They are the natural tendencies of the body and mind. That is why people can show the qualities of evilness, vengeance and cruelties more than the beasts. Eventhough cruelty, fighting tendencies are of the

bestly nature, human mind proceeds a little further that it has vengeance and enmity towards each other for years. These are the reasons behind all human miseries. This cannot be solved. A solution for human evilness is absolutely impossible because it is natural. But the presence of real consciousness which is open in human mind always gives judgement of every aspects of life on the basis of social code and morals and also it is relative. So the relative prick of conscience is the proof of the presence of real consciousness in human mind. This state of mind which is aware of goodness relative to social and moral code makes the life of human being more miserable. That means everybody wishes for being good but by the passions and perceptions of the sense organs, a man is felt being under an unknown force to do all kinds of evil by thought and deed. This 'force' is nothing but the ego of a person. So the ignorant thought of a person, a desireful act of a person, a sinful approach of a person are all the natural state of human mind which is hidden by thousands of tricks in his mind which is altogether known as personality.

If you want to be good and in goodness you need a huge extra energy for living moment to moment in real awareness throughout the day. But it is not possible for a person because it needs tremendous inner energy. Physical life is not designed to live in it. So everybody has to accumulate subtle energy for being in real consciousness, then only one can live in real goodness. Otherwise the goodness is only a trick or a show or a business in life. If you are really good and living in goodness, the eternal life is guaranteed. So people are good for the sake of society to exploit wealth and name that is the trick of your mind and a serious ignorance. So, the so called good people are more slave of their mind than ordinary mass of people.

your mind in subtle ways and it gives the impression that you are saved and your athma is going to God after the death. If you are intelligent Awarology easily proves in you that so far you were following wrong methods in search of the truth of life. But when you get the knack of witnessing the life by the techniques of Awarology, you will be shocked to see your poor past life.

19. Is there any age limit for learning and practising Awarology?

Ans : Awarology should be taught from seven or eight years onwards. There are simple and interesting techniques which can be enjoyed by the children. The effective teaching is possible from the age of 17 to 45. The people exceeding the age of 45 find Awarology little hard and their pre-occupied highly possessive mind reject certain teachings and techniques of it.

Whereas teenagers are highly benefitted by the Awarology. Illegal sexual indulgences, alcohol, smoking, use of drugs, other narcotics etc. are more effectively controlled by Awarology than by any other existing methods adopted by the society so far. A student who understands Awarology properly will never use these things in his life because Awarology does not teach the students to refuse the usages of these things but proves in them the taste of Paramananda by some logical and practical techniques. So that they can compare and understand the difference between the Paramananda and bodily happiness. The approach of Awarology is not psychological, they are put into the realities by logic and experiment of Awarology by themselves. So in Awarology there are no don'ts. Teenagers are highly egoistic so whatever you reject them, they try purposefully to follow it secretly and this can be exploited by the greedy people of the society. They are very anxious to know the world and so they are trapped by this anxiety itself.

and they are equal in arresting the real consciousness forever in your body. So it teaches good has no goodness and bad has no badness; both are cheating tricks of your mind. But society is benefitted with goodness and suffered with badness. That is why society is balanced.

Awarology insists that you yourself become good by learning witnessing; so goodness will happen around you. Wherever you move people feel your goodness or you become a love by witnessing yourself; so loving will happen wherever you go because the only physical product of witnessing is that you share every physical thing in your life with highest intelligence without a desire of benefit from others. When you learn what is witnessing you correct your mind by witnessing so that everything outside will be automatically corrected by itself. Do not try to correct, judge or criticise others that is the super trick of your mind to make your soul a slave forever. (YOU CORRECT YOURSELF, THE THINGS AROUND YOU WILL BE AUTOMATICALLY CORRECTED.)

The real culprit of your miserable life is the inborn self programmed molecules known as genes; so you try to overpower these evilness by the help of witnessing power of mind. By that you can make your mind a servant for you and insist it continuously to remain in awareness. So that all karmas or actions will be non-attached and effect cannot follow the actions. This makes your soul or real consciousness free forever from the desires and escape into eternal life leaving all the bondages of life.

So Awarology has developed and discovered techniques to fool your mind by the help of the mind itself that is the technique of witnessing. All other methods except witnessing strengthen

16. What are the basic ideas of Awarology?

Ans : (a) The whole universe, life and the creation of human beings are the products of the evolutionary process of doomed consciousness, a consciousness being contaminated with ignorance which is a thought. Otherwise the pain of the body system and added miseries like poverty, diseases, wars and disasters would not have happened in human life. The real consciousness (soul or athma) of human being and consciousness in other creatures are found to be self-sufficient and independently functioning. (Example : Body repairs cuts and wounds by itself).

But the whole humanity is taught to believe that the universe is the creation of Great Consciousness (God). If it was like that the creation would have been absolutely perfect and life would have been eternally blissful or in Paramananda. There will not be any pain and added miseries in life. Because the concept of God is perfect. So God can never be wrong' or product of God should not be defective.

(b) According to Awarology the universe and its life are the products of evolution of certain ignorant consciousness or doomed consciousness which is 'parted' from the Great Consciousness (God). As it is a consciousness in itself, it can independently work and the evolution happened in three dimensional matter and energy in fourth dimension of time. But when the evolution reached in human being the ignorant consciousness was opened by the mind and mind recognized consciousness itself. So this consciousness which realizes the consciousness itself is known as real consciousness or soul or athma. So the dimensionless or multidimensional Great Consciousness had to (or forced) evolve in three dimensional objects moving in fourth dimension of time. That is why physical science has developed the ideas of

singularity, bigbang, big crunch, black hole etc. In an evolutionary process nothing stands still, everything is moving. We know that our mind cannot stand still, it is dynamic all the time, it changes with changing thoughts by the tendencies.

C. Awarology teaches and proves the clear distinction between real consciousness (soul) and mind with body. They are entirely opposite entities; one is static and other is dynamic having evolution in time. The static is being spaceless and timeless but the dynamic is having space and time. This contradiction is the greatest riddle of humanity to attain 'Nirvana' or kingdom of god or Samadhi.

The dynamic mind, which is three dimensional and which moves in space and with time is absolutely unaware of real consciousness which is static and dimensionless. So mind can easily play all kinds of tricks with the help of sense organs, to remain itself forever to enjoy sex, and it falls into misery whenever sex is denied due to some domestic reasons.

Therefore worldly life can be easily defined, that life is a play in between sex and misery in a period of time which fulfills the life cycle, hiding the wisdom that human beings are having real consciousness or soul.

When you watch your life closely you can see and prove that whenever the enjoyment of mind by sex is denied or stopped or decreased by some means, the misery starts growing in the life and vice versa. So life is misunderstood in thousands and thousands of ways.

From this Awarology discovers that the dimensional or multidimensional real consciousness which appears to be a 'part' of Great Consciousness in human mind, shows a property of witnessing. So Awarology is a science which teaches you how to remain and live as a witness in your life? How can you find yourself

that. These words to repent, compensate and compromise are the powerful tools of mind to hide its tricks, that is why the society teaches these words with great importance. Nobody understands and agrees that when he repents or compensates or compromises, his mind is using a trick to hide his real consciousness because the real consciousness wants to come out and say that mind is false and full of desires but it is suppressed by the intelligence and language. From this you can conclude that real consciousness has not much influence in bringing the mind into wisdom of the real meaning of life. But it supports life and gives subtle energies to all the biological activities of growing the mind and the body according to their inborn tendencies.

According to Awarology mind has the spontaneous power or influence to work till the death of the body but souls or athmas are helpless to bring the mind into wisdom eventhough it supports the physical life. So in each birth athma searches new possibilities to escape from the body and mind. But mind uses all kinds of tricks using its intelligence and five sense organs. This is the sole reason for the miserable life of human beings. That is why mystics announce that your life is full of miseries. So life is a play between using tricks of mind and dimensional differences.

Your body needs oxygen, water and food and with that your mind automatically work and enter in different karmas and live in cause and effect, the innocent soul or real consciousness does not know the tricks of the mind eventhough it supports the mind with subtle energies.

So Awarology not only rejects so called spiritual methods suggested by the religion but also refuses good and bad karmas in life. Awarology finds good and bad karmas are sons of mind

Ans : Awarology discards all these methods because these methods are all tricks of your subtle mind to trap your soul again and again into the misery of the worldly life. The mind wants to remain in subtle ways taking periodic bodies forever in this world due to a selfish aim that is sex. Of course, there are experiences of certain peace and happiness which is felt by the mind by these methods, but they are temporary. The ignorant mind thinks that Paramananda can be attained by the sex which is three dimensional whereas it doesn't know the intensity of Paramananda due to the dimensional difference. So it rejects all the time the presence of such a bliss. Mind can only think about a thing which has reason whereas Paramananda is reasonless, So mind concludes that there should not be a bliss which is without cause. You know reasons have no substantial existence in our life. It changes as the changes of mind in time. That is why people run after the happiness and try to find it because they have to find a reason for the happiness, otherwise it has no existence.

The mind falsely gives you the impression that you act according to your will and pleasure, but it is absolutely wrong. Sometime You are provoked and get angry with a particular incident, after a while you understand that it is wrong and you repent and ask pardon for that. Here you can see a time delay for knowing the mistake. By the presence of real consciousness you could have had the real understanding at the time of provocation and angry act could have been avoided. But you couldn't, a time delay happened in between the angry act and the understanding. Awarology finds this as trick of mind, it conceales the understanding by the intelligent and vibrational thoughts of the mind. So mind had to repent, compensate and compromise for

as a witness to your life? What are the methods of being a witness? Then you can say that Awarology is a science of witnessing.

If you can witness your life, the ultimate result would be Paramananda or you can enter the kingdom of God or 'Nirvana'. Return is not possible from there to this miserable life. This is the fundamental idea of all religions too.

d. Nansen's School of Awarology consider this teaching of witnessing as a serious one. Because there is dimensional difference between your body - mind relationship and real consciousness, it is not so easy to cross this dimensional difference. No easy way is possible. No equipment is possible, no trick is possible nor any kind of physical means are possible but only by the intelligence of your mind. Therefore right intelligence and right memory are used to learn how to be a witness to cross this dimensional difference. But the difficulty is that the basic nature of mind is dynamic. You cannot stop your dynamic mind by any kind of meditation, yoga or prayer because it is an in-born nature of body and mind. Your body is composed of thousands of cells carrying thousands of genetic programmes encoded in genes. These genes are chemical realities of human being. You can't wipe away or destroy these programmes by any known techniques either physical or spiritual.

That is why Awarology rejects and refuses every physical and spiritual methods.

(You can't make your mind believe that  $2+3 = 6$  in your whole life whatever solutions you suggest) because mind stands in absolute logic which is three dimensional. You can believe certain ideology or religion or some yogic methods and can compromise your life to extend the misery or sexual desires but eternal life or

liberation of soul or Nirvana will be absolutely impossible. So Awarology finds there is one and only method which is possible to release your soul from the thousands of bondages by the tendencies due to the genes, ie witnessing. Because real consciousness shows only one of its qualities through the mind ie witnessing.

So when you know what is witnessing and practise witnessing you will be able to understand the meanings of what is written above and the whole meaning of your birth and death and aim of your life. Otherwise you will run after thousands of ways to find the truth without any result.

e. From the maturity onwards a man lives with logical thinking. He can find causes (whether it is correct or not) for every effect in his dealings and happenings. He will never be able to think without logic (false or true) ie a man can never think  $2+3 = 6$ . His experience never agrees with this equation. So even if he thinks that everything has causes, when he finds no real cause for his death or for happiness or some accidents or unexpected things he imposes the cause on some personal dieties or God. A man is born without his consent. No man asks for his birth in a particular name in a particular caste or religion. And also he grows and dies without his consent. But he knows that he is growing and going to die. Nothing can be done to this process of life by the consciousness.

This is a tragic situation as far as a human being is concerned. He knows that he is born, grows and dies without his consent. So he should not have been given the real consciousness with which he recognises his consciousness. Here he differs from a beast. An animal does not know whether it is born, growing and going to die. This proves logically that a man possesses a

you can think it as Paramananda but you are unconscious at the time of deep sleep that is why you do not understand it is Paramananda. But imagine that you have consciousness at this deep sleep state. Of course you know really that you are in Paramananda or in bliss. But you know that mind cannot enjoy this Paramananda in full swing due to barrier of dimensional difference.

Awarology tries its best by different techniques to liberate your real consciousness from the slavery of body and mind and from their thousands of tendencies due to the presence of genes. Awarology helps you to lead a normal life with neutral mind and gives the taste of Paramananda which is hidden by the dimensional difference and set free your soul at the time of death. This liberation of real consciousness and dissolving it into the Great Consciousness is termed as Eternal life or Samadhi or Nirvana or Kingdom of God. Whereas enlightenment is a particular stage or attainment of wisdom of human mind in which he knows the presence of real consciousness or soul in him, or he recognize himself as a body having a soul. This state is not possible for a beast or a plant eventhough they have consciousness because their consciousness is not opened (doomed). In this state he reaches a stage of non-attachment or Pratyahara (in yoga). So getting enlightenment is not the last word for the eternal life. This is the stage where even highly religious people or mystics go wrong and fall again into the trap of subtle mind or spiritual ego. Many examples can be pointed out for this in this world.

18. Every religions teaches that through love, goodness and sacrifices one can attain eternal life or Samadhi. And also certain yogic methods and meditation are suggested for the same. What is the opinion of Awarology on this?

life or samadhi or Nirvana or the kingdom of God?

Ans : In Awarology your physical life has no meaning. Whatever you earn and acquire will be useless at the time of your death. But Awarology gives you very clear meaning and aim for your life ie it promises eternal life after the death and the taste of eternal peace and taste of Paramananda or bliss (happiness having no reason) in your present life.

First of all it takes away your feeling that you are a person having a particular name born in a particular caste or religion. You are born without the consent of your consciousness. After the birth in a particular caste or religion and in a name, your consciousness knows that you exist after seven or eight years. You grow and live with so many adjustments in life as a particular person. You cannot do anything about the growth of body in time. You are absolutely helpless of oldage and death. This is a tragic situation that you know that you are helpless in growth and death.

But Awarology proves in you that you are not at all a body or a person with a mind having a name in a particular religion but only a PURE CONSCIOUSNESS which is open in a particular body for a period of some 60-70 years. Your aim in life is not to work hard for the children and family and earn for them till your death. If it was meant for that a beast's consciousness is more than sufficient for you.

So Awarology teaches you that your consciousness (soul or athma) has got a very good opportunity as gift to open the possibility of your soul being liberated forever into its original source, that is the Great Consciousness which is a Paramananda or absolute bliss.

You know that when you are in deep sleep you have no bodily pain and added miseries like mental pain or poverty. So

real consciousness (soul) a 'part' of the Great Consciousness (God) which is a dimensional difference, that is why he is unaware of it. This is one of the basic ideas of Awarology ie a man is an exclusive animal who possesses a real consciousness (a consciousness which recognizes the consciousness which is the reason for whole universe that we know and see) which we can roughly call as soul of man because the word soul does not possess the full meaning of real consciousness.

Life is a cyclic process. Body is born, grown and dies, and if you do not know the secret behind it you are like an animal. A triggering "force" is needed for this cyclic process of the life that is the consciousness itself which is a "part" of the Great Consciousness but this consciousness of growth and evolution is absolutely ignorant. That is why Awarology says that the whole universe is the product of an ignorant consciousness which undergoes evolution. The final state of this evolution is human mind that carries an additional factor (w) which recognizes this ignorant consciousness. So this factor is called the Real consciousness (w) for a person x this real consciousness is denoted by Wx in Awarology.

If the ignorant consciousness of a person is denoted by fxdx (fd for the fundamental desire of a person x). So the human mind of a particular person x - is denoted by fxdx Wx.

Annihilation of the factor fxdx from a person is the practical side of the Awarology. Using the Science of Awarology it is possible to remove the factor fxdx from the combination of the mind and set free wx forever which never comes back to take earthly cyclic body which is full of misery and pain ie if the mind of a person is denoted by 'Mx'

$$\begin{aligned} Mx &= fx dx Wx \\ \text{ie } \frac{Mx}{fx dx} &= Wx \end{aligned}$$

Wx being an unchanged or constant factor which is the consciousness itself. We can state the equation as a statement  $Mx \propto fx dx$

ie mind of a person is directly proportional to his fundamental desire. So if a man's desire grows more, the state of mind or intelligence increases. The desire is connected to the other people. If others aren't there no desire is possible. That means if mind's tendencies are said to be an ego of a person, ego increases with fd and you know ego is always outside and it looks out to the world through the five sense organs of the body.

By the growth of intelligence or logic, ego is growing higher and higher for a person. This ego depends on others and is connected, so a collective ego is formed which is growing forward collectively. This is termed as civilization. In this growth a particular person who is intelligent becomes a fool if his intelligence is carried or proceeded by others. (For example Albert Einstien found himself a fool (he openly said) as far as the idea of Quantum Mechanics are concerned eventhough he contributed many ideas for Quantum Mechanics).

So far it has been proved that this hike of intelligence or ego has nothing to do with poor mass of people. Their poverty, difficulties, tragedies are increasing and taking different shape by this intellectual evolution. The present state of the world clearly shows this state. A small percentage of families and money dealing brokers in international level become millionaires. They accumulated more money and power than the government bodies. So majority of people become poorer and poorer and their sufferings increased. This shows that the growth of intelligence is negative. In Awarology this negative intelligence is due to the fundamental desire of the collective consciousness, a

consciousness which is ignorant and unaware itself and evolving in darkness.

Whatever may be the greatness of physical science and social sciences, the sufferings of human beings go on increasing. This is not intelligence, this is ignorance. Intelligence is growing due to the increasing of desires and desires have no limit at all, that is the fundamental nature of desire. So there is no hope. "A tree is known with its fruits".

In Awarology, intelligence is grown by logic itself as in the case of physical sciences but not to outside ie not to increase ego but to decrease desires. Awarology makes a man to go to his mind with intelligent logic to annihilate fd (fundamental desire) step by step, so that mind is divided layer by layer removing the ignorance and the state of being in mind tends to zero by the 'uplift' of real consciousness (w) this makes one's physical life full of eternal peace and with a taste of Paramananda (a causeless bliss) and at the time of death W is released from the combination forever.

But there is a problem that the mind can never be annihilated by the logic. Mind strengthens when the logic is getting stronger. So Awarology approaches mind by the logic and through the logic and by inner experiments, helps the mind to go beyond the logic. This is the only possible way of annihilating the mind by decreasing the frequency of its spontaneous thoughts.

In brief, Awarology is the science which removes the ignorance of the intelligence and release the athma or real consciousness forever into the eternal life from the misery of worldly life to reunite (yoga) with its original source, the Great Consciousness.

17. What is the main difference between enlightenment and eternal
